

Day 01: Offensive Security Intro

The screenshot shows the 'Offensive Security Intro' room page on TryHackMe. At the top, there's a navigation bar with icons for a folder, a book, a refresh, a search, a notification bell with '0', and a profile icon. Below the navigation bar, the breadcrumb trail reads 'Pre Security > Introduction to Cyber Security > Offensive Security Intro'. A large sword icon is on the left. The main title 'Offensive Security Intro' is in large white font. Below it, the description says 'Hack your first website (legally in a safe environment) and experience an ethical hacker's job.' There are icons for signal strength, a bot, a clock showing '15 min', and a group of people showing '3,393,183'. Below these are three buttons: 'Save Room', '72743 Recommend', and 'Options'. At the bottom, a progress bar shows 'Room progress (22%)'.

Pre Security > Introduction to Cyber Security > Offensive Security Intro

Offensive Security Intro

Hack your first website (legally in a safe environment) and experience an ethical hacker's job.

Task 01: What is Offensive Security?

The screenshot shows the 'Task 1: What is Offensive Security?' interface. At the top, it says 'Task 1' with a green checkmark and the title 'What Is Offensive Security?'. Below this, there's a quote: 'To outsmart a hacker, you need to think like one.' followed by a paragraph explaining the core of 'Offensive Security'. Then, there's a section titled 'Beginning Your Learning Journey' with two paragraphs of text. Below that, it says 'Answer the questions below' with a green underline. The question is: 'Which of the following options better represents the process where you simulate a hacker's actions to find vulnerabilities in a system?'. There are two radio button options: 'Offensive Security' and 'Defensive Security'. At the bottom, there's a text input field containing 'Offensive Security', a green 'Correct Answer' button, and an orange 'Hint' button.

Task 1 What Is Offensive Security?

"To outsmart a hacker, you need to think like one."

This is the core of "Offensive Security." It involves breaking into computer systems, exploiting software bugs, and finding loopholes in applications to gain unauthorized access. The goal is to understand hacker tactics and enhance our system defences.

Beginning Your Learning Journey

In this TryHackMe lesson, you will be guided through hacking your first website in a legal and safe environment. The goal is to show you how an ethical hacker operates.

But before we do that, let's review by answering the questions below. Type your answer in the text box after the question and click the "Submit" button. When you're done, proceed to Task 2.

Answer the questions below

Which of the following options better represents the process where you simulate a hacker's actions to find vulnerabilities in a system?

- Offensive Security
- Defensive Security

Offensive Security ✓ Correct Answer Hint

Task 02: Hacking your first machine

Task 2

Hacking Your First Machine

Here at TryHackMe, we use Virtual Machines to create simulated environments that serve as practical complements to rooms.

In this room, we have prepared a fake bank application called Fakebank that you can safely hack. To start this machine, click on the **"Start Machine"** button at the top right of this task. Your screen should be split in half, showing this content on the left and the newly launched machine on the right. You should see a browser window showing the website below:

▶ Start Machine

From this page, an attacker has authorized access and can steal money from any bank account. As an ethical hacker, you would (with permission) find vulnerabilities in their application and report them to the bank to fix them before a hacker exploits them.

Your mission is to transfer \$2000 from bank account 2276 to your account (account number 8881). If your transfer was successful, you should now be able to see your new balance reflected on your account page.

Go there now and confirm you got the money! (You may need to hit Refresh for the changes to appear)

Answer the questions below

Above your account balance, you should now see a message indicating the answer to this question. Can you find the answer you need?

BANK-HACKED

Task 03: Carrer in Cyber Security

Task 3

Careers in cyber security

How can I start learning?

People often wonder how others become hackers (security consultants) or defenders (security analysts fighting cybercrime), and the answer is simple. Break it down, learn an area of cyber security you're interested in, and regularly practice using hands-on exercises. Build a habit of learning a little bit each day on TryHackMe, and you'll acquire the knowledge to get your first job in the industry.

Trust us; you can do it! Just take a look at some people who have used TryHackMe to get their first security job:

- Paul went from a construction worker to a security engineer. [Read more](#)
- Kassandra went from a music teacher to a security professional. [Read more](#)
- Brandon used TryHackMe while at school to get his first job in cyber. [Read more](#)

What careers are there?

The cyber careers lesson goes into more depth about the different careers in cyber. However, here is a short description of a few offensive security roles:

- Penetration Tester - Responsible for testing technology products for finding exploitable security vulnerabilities.
- Red Teamer - Plays the role of an adversary, attacking an organization and providing feedback from an enemy's perspective.
- Security Engineer - Design, monitor, and maintain security controls, networks, and systems to help prevent cyberattacks.

Answer the questions below

Read the above, and continue with the next room!
